1. Scope (iteration)

2. Summary

All user related Actor – Use Case relationships of the Use Case Model are specified as user interface input—output forms	
There are no user interactions, not related to Use Case Model	
All quality requirements, applicable to user interface, are specified	
There are no considerations of quality criteria, not required in PBS or exceeded the required level	
All constraints, applicable to user interface, are considered in User Model and specified if necessary	
There are no additional constraints, not required in PBS or exceeded the required level	

3. User related Actor – Use Case relationships not specified

4. Redundant user interactions, not related to Use Case Model

5. Quality requirements not specified

6. Redundant criteria, not required in PBS

7. Constraints not considered in User Interface model

8. Redundant constraints, not required in PBS
